achalkharole6@gmail.com — LinkedIn — GitHub

Professional Summary

Recent B.Tech graduate with strong knowledge of Python, SQL, Object-Oriented Programming, and Data Science fundamentals. Hands-on experience in Python application development through internship and academic projects. Passionate about software engineering and eager to contribute to developing scalable applications while continuously learning modern technologies.

Technical Skills

- **Programming Languages:** Python, SQL
- **Core Concept:** Object-Oriented Programming (OOP), Data Structures and Algorithms (Basic), Problem Solving
- **Data Science:** Pandas, NumPy, Matplotlib, Data Preprocessing, Machine Learning
- **Database:** MySQL, SQL Queries, Joins, Subqueries
- **Version Control:** Git, GitHub
- **Tools:** VS Code, Power BI, Tableau, Excel

Internship Experience

Application Developer Intern

NexaNova Protect — Remote — June 2025 – December 2025

- Developed and maintained Python modules for application functionality.
- Debugged and resolved software issues to improve application performance.
- Worked with backend logic and data processing.
- Collaborated with the development team using Git for version control

Projects

Financial Transaction Fraud Detection (Machine Learning)

- Developed a machine learning model using Python, Pandas, NumPy, and Scikit-learn to detect fraudulent financial transactions.
- Performed data preprocessing, feature engineering, missing value handling, and feature scaling to improve model performance.
- Evaluated the model using appropriate performance metrics and optimized predictive accuracy.

Hospital Management System (MySQL)

- Designed a normalized relational database with multiple interconnected tables for managing patients, doctors, appointments, and billing.
- Implemented CRUD operations, SQL joins, subqueries, constraints, and aggregate functions to retrieve and manage data efficiently.
- Optimized SQL queries to improve database performance and maintain data integrity.

Library Management System (Python)

- Developed an Object-Oriented Python application to manage books, users, and borrowing transactions.
- Implemented file handling, exception handling, and modular programming to ensure reliable data storage and application stability.
- Automated book issue, return, and search functionalities using reusable Python classes and functions.

Education

Bachelor of Technology (B.Tech)

Kavikulguru Institute of Technology and Science, Ramtek
RTM Nagpur University
CGPA: 7.36/10 — 2021–2025

Certifications

- **Python Full Stack in Data Science**
First Bit Solutions, Pune
